Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

Drawings Objection

The drawings are objected to because:

(1) In Fig.7, reference numerals "1,3,7,8,10,11,12,13" have not been described in the specification.

(2) In Fig.14, reference numerals "1402,1403,1407,1409,1410,1411,1412" have not been described in the specification.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Objection to the Specification

The disclosure is objected to because of the following informalities:

- (1) In paragraph [0005], line 1 is an incomplete sentence.
- (2) In paragraph [0029], lines 1 and 3 , "342" should read --340--.
- (3) In paragraph [0035], line 1, after "300", --.-- should be added.
- (4) In paragraph [0035], line 5, "of the hole" should be deleted.
- (5) In paragraph [0035], line 12, "310" should read --301--.
- (6) In paragraph [0037], line 12, "blade 310" should read --pin 342--.
- (7) In paragraph [0046], line 3, "342" should read --340--.
- (8) In paragraph [0056], line 1, "402" (second occurrence) should read --340--.

Appropriate correction is required.

Claims Rejection - 35 U.S.C. 102(e)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 25, 28 and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Carter, III (U.S. Patent Application Publication 2005/0072004).

Carter, III discloses a folding knife (Figs.7-11) comprising means (33) for receiving, at a closed knife, an external force configured to pen a blade (30); means (i.e. the blade) for repositioning an offset cam pin (72) from within a convex extension (i.e. a convex extension slot that is positioned on one end of the arcuate slot 80) to substantially within an arcuate slot (80); and means (74) for applying an opening force configured to open the blade (30) to a fully open position without additional external force as claimed. Further, means (74) applies a torsional (i.e. turning) force to the blade (30).

Claim Rejection - 35 U.S.C. 103(a)

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 29 is rejected under 35 U.S.C. 103(a) as being unpatentable over Carter, III (U.S. Patent Application Publication 2005/0072004) in view of Chu (U.S. Patent No. 6,729,029).

Carter, III as set forth shows all the claimed structure except the force applying means (74) is in the form of a leaf spring rather than a torsional spring.

However, it is well known in the art to use a torsional spring for assist in opening a blade of a folding knife as evidenced by Chu.

Therefore, it would have been obvious to one skilled in the art to modify Carter, III by using a torsional spring as a force applying means for assist in opening the blade (30) of the folding knife.

Indication of Allowable Subject Matter

1. Claims 1-24 are allowed. Claims 1-24 contain allowable subject matter because none of the prior art of record taken alone or in combination thereof shows or fairly suggests a folding knife comprising a blade which has a hole for receiving a latch cam having an offset pin that is partially engaged in at least one of an arcuate slot or a convex extension slot formed in a reference piece of the knife.
2. Claims 26 and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art Citations

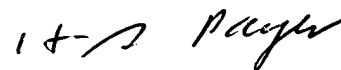

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Moizis and Frazer are cited as art of interest.
